Moderation of climate effects: no interaction survives FDR correction
Seasonality x mean temperature (all six metrics) and body−size x temperature (Connectance); S >= 1
Connectance
Modularity (Q)
Standardised modularity (z−Q)
Nestedness (z−NODF)
Mean link strength
Mean closeness
Temperature x body−size (SD)
Temperature x body−size (ratio)
−0.08
−0.04
0.00
Standardised interaction coefficient
